Consider Fixing:

Minify JavaScript

Compacting JavaScript code can save many bytes of data and speed up downloading, parsing, and execution time.

[Minify JavaScript](#) for the following resources to reduce their size by 902B (30% reduction).

- Minifying <https://m.favoritsport.com.ua/live/js/config.js> could save 902B (30% reduction) after compression.

Optimize images

Properly formatting and compressing images can save many bytes of data.

[Optimize the following images](#) to reduce their size by 93.3KiB (21% reduction).

- Compressing <https://m.favoritsport.com.ua/static/themes/default/mobile/images/bg.png> could save 87.2KiB (21% reduction).

Mobile

- Compressing <https://m.favoritsport.com.ua/static/themes/default/mobile/images/stars.png> could save 2.5KiB (21% reduction).
- Compressing <https://m.favoritsport.com.ua/static/themes/18/img/logo.png> could save 2.2KiB (24% reduction).
- Compressing <https://m.favoritsport.com.ua/static/themes/58/img/header-bg-01.jpg> could save 1.3KiB (80% reduction).

Prioritize visible content

Your page requires additional network round trips to render the above-the-fold content. For best performance, reduce the amount of HTML needed to render above-the-fold content.

The entire HTML response was not sufficient to render the above-the-fold content. This usually indicates that additional resources, loaded after HTML parsing, were required to render above-the-fold content. [Prioritize visible content](#) that is needed for rendering above-the-fold by including it directly in the HTML response.

- Only about 47% of the final above-the-fold content could be rendered with the full HTML response snapshot:20.

Prioritize visible content

Your page requires additional network round trips to render the above-the-fold content. For best performance, reduce the amount of HTML needed to render above-the-fold content.

The entire HTML response was not sufficient to render the above-the-fold content. This usually indicates that additional resources, loaded after HTML parsing, were required to render above-the-fold content. [Prioritize visible content](#) that is needed for rendering above-the-fold by including it directly in the HTML response.

- Only about 5% of the final above-the-fold content could be rendered with the full HTML response snapshot:71.
