## Eliminate render-blocking JavaScript and CSS in above-the-fold content

Your page has 5 blocking script resources and 6 blocking CSS resources. This causes a delay in rendering your page.

None of the above-the-fold content on your page could be rendered without waiting for the following resources to load. Try to defer or asynchronously load blocking resources, or inline the critical portions of those resources directly in the HTML.

### [Remove render-blocking JavaScript:](#)

### Consider Fixing:

#### Enable compression

Compressing resources with gzip or deflate can reduce the number of bytes sent over the network.

[Enable compression](#) for the following resources to reduce their transfer size by 5.1KiB (43% reduction).

- Compressing <http://js.hotlog.ru/dcounter/2569491.js> could save 1.3KiB (63% reduction).

- Compressing <http://newsletter.com/.s/img/icon/social/fb.svg> could save 178B (30% reduction).

## Minify CSS

Compacting CSS code can save many bytes of data and speed up download and parse times.

[Minify CSS](#) for the following resources to reduce their size by 2.1KiB (13% reduction).

- Minifying <http://newsletter.com/.s/src/layer7.css> could save 1.1KiB (15% reduction) after compression.
- Minifying <http://newsletter.com/.s/src/base.css> could save 496B (11% reduction) after compression.
- Minifying [http://newsletter.com/\\_st/my.css](http://newsletter.com/_st/my.css) could save 488B (12% reduction) after compression.

## Minify HTML

Compacting HTML code, including any inline JavaScript and CSS contained in it, can save many bytes of data and speed up download and parse times.

[Minify HTML](#) for the following resources to reduce their size by 1.2KiB (16% reduction).

- Minifying <http://w.uptolike.com/widgets/v1/share-counter.html?c9f89a21c5a57f736984fb59b0fa08ea> could save 655B (16% reduction) after

compression.

- Minifying <http://w.uptolike.com/widgets/v1/zp/support.html> could save 595B (16% reduction) after compression.

## Minify JavaScript

Compacting JavaScript code can save many bytes of data and speed up downloading, parsing, and execution time.

[Minify JavaScript](#) for the following resources to reduce their size by 1.5KiB (29% reduction).

- Minifying <http://newsletter.com/.s/src/jquery.smartbanner.js> could save 1.2KiB (35% reduction) after compression.
- Minifying <http://js.hotlog.ru/dcounter/2569491.js> could save 391B (20% reduction).

## Prioritize visible content

Your page requires additional network round trips to render the above-the-fold content. For best performance, reduce the amount of HTML needed to render above-the-fold content.

The entire HTML response was not sufficient to render the above-the-fold content. This usually indicates that additional resources, loaded after HTML parsing, were required to render above-the-fold content. [Prioritize visible content](#) that is needed for rendering above-the-fold by including it directly in the HTML response.

- Only about 69% of the final above-the-fold content could be rendered with the full HTML response.
- Click to see the screenshot with only the HTML response: [snapshot:12](#)

## 60 / 100 User Experience

### Should Fix:

## Configure the viewport
