Should Fix:

### Eliminate render-blocking JavaScript and CSS in above-the-fold content

Your page has 3 blocking script resources and 2 blocking CSS resources. This causes a delay in rendering your page.

None of the above-the-fold content on your page could be rendered without waiting for the following resources to load. Try to defer or asynchronously load blocking resources, or inline the critical portions of those resources directly in the HTML.

#### Remove render-blocking JavaScript:

- <http://spielespielen.jouwpagina.nl/target.php>
- <http://www.jouwpagina.nl/js/linksboven.php>
- <http://cas.criteo.com/delivery/ajs.php?zoneid=37486&nodis=1&cb=14881141134&exclude=undefined&charset=windows-1252&loc=http%3A//spielespielen.jouwpagina.nl/>

## Mobile

[Optimize CSS Delivery](#) of the following:

- <http://www.jouwpagina.nl/style.css>
- <http://spielespielen.jouwpagina.nl/paginastyles/spielespielen.css>

### Consider Fixing:

#### Enable compression

Compressing resources with gzip or deflate can reduce the number of bytes sent over the network.

[Enable compression](#) for the following resources to reduce their transfer size by 2.4KiB (64% reduction).

- Compressing <http://www.jouwpagina.nl/style.css> could save 1.8KiB (65% reduction).
- Compressing <http://spielespielen.jouwpagina.nl/paginastyles/spielespielen.css> could save 635B (61% reduction).

#### Leverage browser caching

Setting an expiry date or a maximum age in the HTTP headers for static resources instructs the browser to load previously downloaded resources from local disk rather than over the network.

[Leverage browser caching](#) for the following cacheable resources:

- <http://spielespielen.jouwpagina.nl/target.php> (expiration not specified)
- <http://www.jouwpagina.nl/js/linksboven.php> (expiration not specified)
- <http://www2.mystats.nl/include.js> (expiration not specified)
- <http://www.google-analytics.com/ga.js> (2 hours)

### Minify HTML

Compacting HTML code, including any inline JavaScript and CSS contained in it, can save many bytes of data and speed up download and parse times.

[Minify HTML](#) for the following resources to reduce their size by 355B (11% reduction).

- Minifying <http://spielespielen.jouwpagina.nl/> could save 355B (11% reduction) after compression.

### Minify JavaScript

Compacting JavaScript code can save many bytes of data and speed up downloading, parsing, and execution time.

[Minify JavaScript](#) for the following resources to reduce their size by 132B (15% reduction).

- Minifying <http://spielespielen.jouwpagina.nl/target.php> could save 132B (15% reduction) after compression.

## 59 / 100 User Experience

### Should Fix:

## Configure the viewport

Your page does not have a viewport specified. This causes mobile devices to render your page as it would appear on a desktop browser, scaling it down to fit on a mobile screen. Configure a viewport to allow your page to render properly on all devices.

[Configure a viewport](#) for this page.

## Size tap targets appropriately

Some of the links/buttons on your webpage may be too small for a user to easily tap on a touchscreen. Consider [making these tap targets larger](#) to provide a better user experience.

The following tap targets are close to other nearby tap targets and may need additional spacing around them.

## Mobile

- The tap target `<a href="http://www.jouwpagina.nl/">Maak je eigen startpagina</a>` and 1 others are close to other tap targets final.

- The tap target `<a href="contact.php">Contact: Vrage...ies, linkruil?</a>` is close to 2 other tap targets final.

## Use legible font sizes

The following text on your page renders in a way that may be difficult for some of your visitors to read. [Use legible font sizes](#) to provide a better user experience.

The following text fragments have a small font size. Increase the font size to make them more legible.

- Maak je eigen startpagina renders only 4 pixels tall (11 CSS pixels) final.
- Alle JouwPagina.nl&#39;s and 2 others render only 4 pixels tall (11 CSS pixels) final.
