Should Fix:

Eliminate render-blocking JavaScript and CSS in above-the-fold content

Your page has 1 blocking script resources and 1 blocking CSS resources. This causes a delay in rendering your page.

None of the above-the-fold content on your page could be rendered without waiting for the following resources to load. Try to defer or asynchronously load blocking resources, or inline the critical portions of those resources directly in the HTML.

Consider Fixing:

Leverage browser caching

Setting an expiry date or a maximum age in the HTTP headers for static resources instructs the browser to load previously downloaded resources from local disk rather than over the network.

97 / 100 User Experience

Consider Fixing:

Size tap targets appropriately

Some of the links/buttons on your webpage may be too small for a user to easily tap on a touchscreen. Consider [making these tap targets larger](#) to provide a better user experience.

The following tap targets are close to other nearby tap targets and may need additional spacing around them.

- The tap target `وحید قمصری` targets tap other to close are others 20 and `<a/>`
- The tap target `وحید قمصری` targets tap other to close are others 30 and `<a/>`
- The tap target `وحید قمصری` targets tap other to close are others 1 and `<a/>`
- The tap target `وحید قمصری` targets tap other to close are others 2 and `<a/>`
- The tap target `` is close to 1 other tap targets.
- The tap target `بهترین های سایت` and 5 others are close to other tap targets.
- The tap target `` and 6 others are close to other tap targets.
- The tap target `دکمه بازگشت به بالا` targets tap other 1 to close is `<a/>`
