Should Fix:

Eliminate render-blocking JavaScript and CSS in above-the-fold content

Your page has 19 blocking script resources and 24 blocking CSS resources. This causes a delay in rendering your page.

None of the above-the-fold content on your page could be rendered without waiting for the following resources to load. Try to defer or asynchronously load blocking resources, or inline the critical portions of those resources directly in the HTML.

Consider Fixing:

Size tap targets appropriately

Some of the links/buttons on your webpage may be too small for a user to easily tap on a touchscreen. Consider [making these tap targets larger](#) to provide a better user experience.

The following tap targets are close to other nearby tap targets and may need additional spacing around them.

- The tap target `Моя учетная запись` is close to 1 other tap targets.
- The tap target `` and 2 others are close to other tap targets.
